

## Executive Summary

**Securative Healthcare Solutions** leverages relationships with strategic partners to offer our client physicians, practices and hospitals fully integrated healthcare management solutions that optimize safety, quality, efficacy, compliance and of course revenues - with due regard to the clinical and financial mandates contained in the Patient Protection Affordable Care Act (PPACA).

Our mission is to reduce risks and enhance outcomes in the delivery of health care giving our clients, their patients and their communities access to a higher quality of life. Together we will reduce hospital admissions, empower prevention and educate all patients to be proactive in their chronic care needs.

How do we provide this support?

The engine of our design is a ***fully compliant and fully implemented*** Preventive Health platform that facilitates customized Chronic Care Management protocols and channels eligible patients directly into strategic, high value preventive or diagnostic/treatment programs that address the major health crises our nation faces today (Asthma, Allergies, Diabetes, Alzheimers, Cancer, Obesity, Arthritis, Stroke, Heart Disease, Addiction, Behavioral and Mental Health and Adverse Drug Reactions).

Each of these highly lucrative platforms addresses major CMS clinical initiatives as detailed in required quality indicator reporting, and we require that each is screened periodically for cybersecurity risk, both independently and in combination. Healthcare providers are not charged any fees for these services (unless direct consultative support is requested and contracted) as we gain our income from the use of the strategic platforms we offer.

We also assist our physician clients in the generation of lucrative new revenue streams, such as transforming lives through the combination of innovative nutraceuticals and other supporting modalities (i.e.- Hyperbaric, PEMF, laser) along with the latest advancements in Regenerative Medicine.

Securative's leadership team has a combined experience of 100+ years through professional delivery of sales and service to a number of economic sectors including medical practices, hospitals and government offering medical services and devices, managed care, diagnostic lab testing, risk management, regulatory compliance, workplace wellness programs and nutraceuticals.
